American Medical News Index-1983

Prepared by the Division of Library and Archival Services

Volume 26

American Medical News Index Volume 26 - 1983

American Medical News (AMN) reports on events of interest to the medical profession and on the activities of the AMA. Every attempt is made to present all sides of an issue in an accurate and concise manner.

Of the three editions of AMN, only the one-star and three-star editions are indexed. Citations give date of issue and page number of the three-star edition. If an article is contained only in the three-star edition (***) or in the one-star edition (*) this fact is noted in the citation. Most articles are indexed, including brief items under MEDICINE'S WEEK. Not indexed are THIS WEEK IN JAMA, PROJECT USA, and product advertising.

Indexer: Jane Larkin
